

Pulse preparation: absolute spectra, no fitted energy shifts or peak normalization

Original-electron band near 0.3 a.u.

Later-ionization band near 0.6 a.u.

- Previous: F1=.02, N1=12; F2=.0534, N2=76
- - - Selected: F1=.08, N1=48; pi pulse N2=201 (small model)
- Selected: finer radial/angle basis, final ion $n \leq 3$
